

orgor1's 1980 Sportster

This 1980 Ironhead Sportster runs & drives good.

This thirty-two year old bike needs a little TLC.

It has new forward foot controls, front & rear sprockets with chain, air cleaner, blinkers and wiring, headlight, brake pads front & rear, coil & plugs, and battery.

The pipes are loud and come with baffles so you can pass inspection. It has a removable windshield. It needs a little brake and carb work.
